

VIRGINIA SPACEPORT AUTHORITY · LIVE TRAINING

Microsoft 365 Copilot at Work

Making Copilot work for you.

Scott Hay · Microsoft Certified Trainer · AIA Copilot

SESSION C · 60 MINUTES

Copilot in PowerPoint & Word

Draft the document. Defend the decision.
Command the deck.

SESSION C · THE SCENARIO

The readiness brief is due Friday

Campaign MERIDIAN's Launch Readiness Review is July 24. Leadership wants one clean document.

Three source documents - status report, risk register, tenant agreement

Three vendor proposals - the Pad B inspection decision needs a defensible pick

One afternoon - that's the whole budget

Document Copilot - your daily four

Word drafts grounded

Reference your files and draft whole sections from them.

Rewrite any selection

Select the text, then command: simpler, shorter, board-ready.

Summarize either app

A long document or a 60-slide deck - the narrative in one prompt.

Ask your document

Interrogate contracts and policies; answers point to the section.

Select first, then command - rewrites work on the text you select.

Point Copilot at your sources

Attach in Chat

Works everywhere, every time - the reliable move from Session A.

Reference in Word

Draft with Copilot can pull from files in OneDrive/SharePoint - stage them there first.

One ask, one source set

Name 2-3 sources max per draft - focus beats a document dump.

Draft the readiness brief in Word

LIVE DEMO

- 1** New doc - Draft with Copilot, reference 2 sources
- 2** Grounding contrast: same ask, no sources
- 3** Select exec summary → rewrite for the board
- 4** Ask the doc: 'weakest section?'

Paste these into Word

What you're practicing

- Reference sources in the draft prompt
- Contrast grounded vs not - once
- Select first, then rewrite
- Interrogate long documents

PASTE THIS

“

Write a [brief/memo/summary] covering [topics] based on [your reference files]. Include owners and dates.

“

Rewrite this selection for [audience]: [tone], half the length, keep all numbers.

“

What does this document say about [topic]? Point me to the section.

Interrogate a contract - patterns

The obligations

'List every obligation on OUR side, with section numbers and deadlines.'

The exposure

'What are the penalties, termination triggers, and payment risks here?'

The gaps

'What would a careful lawyer say is missing from this agreement?'

Draft in Word - or in Chat?

Word

- The document is the deliverable
- Formatting and structure matter
- You'll edit selection by selection

Copilot Chat

- Exploring across many sources
- Comparing, deciding, synthesizing
- Output feeds a doc later

 Rule of thumb: Chat to think, Word to ship.

SESSION C · EVALUATION

Judgment you can defend

Rubric first - then read

01

Spec

Extract the
must-
haves.

>

02

Rubric

Copilot
drafts; you
approve.

>

03

Score

Same test,
every
option.

>

04

Dissent

Argue FOR
the
weakest.

>

05

Memo

Scores +
dissent,
together.

Pick the inspection vendor - defensibly

LIVE DEMO

- 1** Attach the inspection spec → build the rubric
- 2** Attach 3 proposals → score against the rubric
- 3** Devil's advocate the weakest scorer
- 4** Recommendation memo - scores + dissent

Paste these - evaluate anything

Works on any decision

- Proposals, resumes, options, tools
- Rubric BEFORE you read
- Same test for every option
- Dissent captured, not buried

PASTE THIS

“

From this specification, build a weighted evaluation rubric: 5-6 criteria, weights summing to 100, one line on what excellent looks like.

“

Score each option against this rubric. Table: criterion, weight, score, weighted total. Cite your source per score.

“

Argue FOR the lowest scorer - steelman it in 5 bullets. Then draft the recommendation memo with a Dissent Considered section.

Rubric-first works on...

Anything with options

Vendors, candidates, tools, venues - if there's a spec and choices, it fits.

Anything contested

When stakeholders disagree, the rubric moves the fight from opinions to weights.

Anything audited

Grants, procurement, compliance picks - the dissent section is your armor.

SESSION C · POWERPOINT

Command the deck you inherited

PPT Copilot within its strengths

Summarize a deck

Inherit 25 slides? Get the narrative and key numbers in one prompt.

Tighten slide text

Select wordy bullets - 'cut to 6 words each, keep the numbers.'

Ask the deck

'Which slides mention the budget?' - navigate big decks by question.

Copilot polishes the deck you built - structure and story stay yours.

Inherit a deck - command it

LIVE DEMO

- 1** Open Spaceport_Overview.pptx (24 slides)
- 2** 'Summarize this presentation in 5 bullets'
- 3** Select a wall-of-words slide → tighten
- 4** 'Which slides mention tenant obligations?'

Paste these into PowerPoint

What you're practicing

- Summarize before you present
- Tighten selection by selection
- Navigate decks by question
- Numbers survive every rewrite

PASTE THIS

“

Summarize this presentation in 5 bullets for someone presenting it tomorrow.

“

Rewrite as max 6 words per bullet, keep all numbers.

“

Which slides mention [topic]?

The document loop

01

Gather

Sources into
OneDrive/ShareP
oint first.

02

Draft grounded

Reference the
sources in the
prompt.

03

Rewrite passes

Per audience -
select, command.

04

Verify

Numbers and
names against
sources.

Your document week

Three lines to keep

“

Grounded drafts beat
blank pages.

“

Rubric first - then read the
options.

“

Copilot polishes the deck
you built.

Questions - then go draft

Before you log off

Draft one real document section with source references this week - and next decision with options, build the rubric first.

Coming up

Today 2:00 - Session D:
OneNote & Excel. Formulas on demand, notes into actions.

APPENDIX

Your environment reference

The availability map - July 2026.

Use today - and what's next

USE TODAY	NOT YET AVAILABLE HERE
Chat with attached files	Enterprise-wide chat grounding
Word: grounded drafts, rewrites	PPT auto-create, speaker notes
PPT & Word: summarize, tighten	Teams: recap and chat Copilot
Outlook: summarize, draft, coach	Outlook: Schedule with Copilot
Excel: formulas, explain, what-if	Excel: Python and automation
OneNote: summaries, actions	Edge sidebar; web grounding
